GAME BOY[®] camera

The Game Boy is the greatest mobile games machine in the world - and not just because it lets you play games on the move. With the Game Boy Camera you can use your Game Boy to record your travels in picture form!

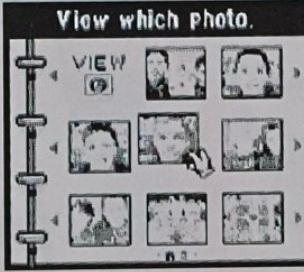

Plug the Camera Game Pak into your Game Boy and the lens on top of the Pak transmits an image to the Game Boy screen. Then a single button-press takes the picture and saves it to the Pak. It's that simple. But there's so much more that the Game Boy Camera can do - the only limit is your imagination!

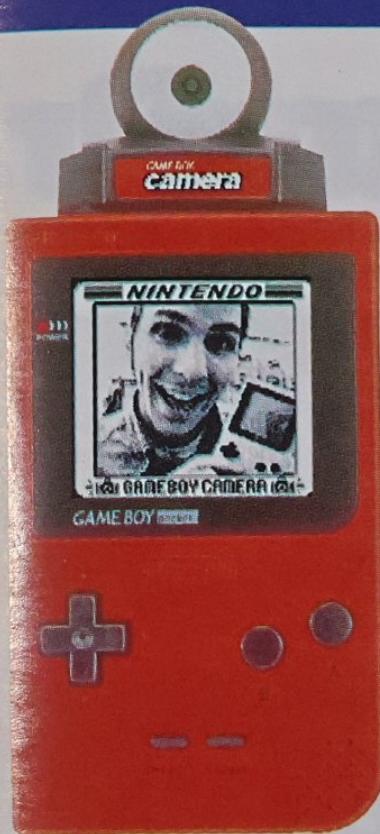

▲ Insert the Game Boy Camera then switch on. The on-screen menus lead you through the cameras functions, from taking snaps to playing games!

▲ Line up your shot and adjust the brightness and contrast using the Game Boy controls. The 180-degree swivelling lens means you can even take self-portraits!

▲ Store up to 30 pictures in the Game Boy Camera album, each with their own designer frame. View them in a slide show and delete the ones you don't like.

▲ The Shutterbug menu lets you take pictures using a variety of trick techniques. Flip your snaps, or take a panoramic sequence of pics that link together.

The Game Boy Classic is the original hand-held games console! Almost ten years old and it's still going strong! ▶

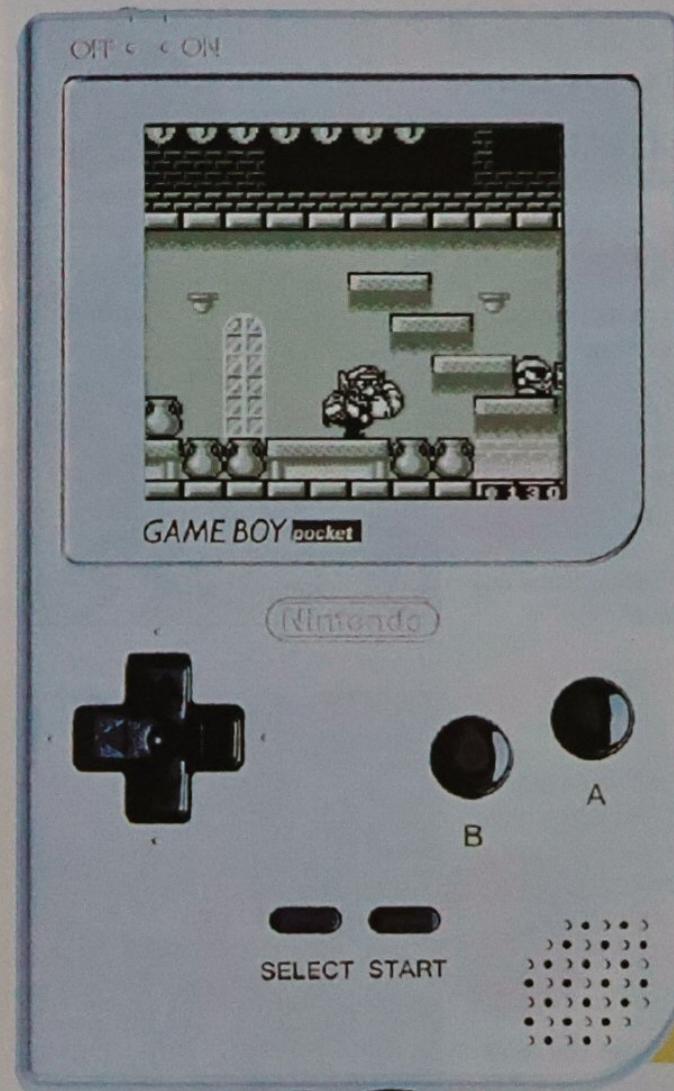

▲ Game Boy Pocket comes in these six case colours: red, yellow, green, black and silver, as well as the awesome *transparent* Game Boy Pocket! The latest addition to the range is a Game Boy Pocket in shocking pink! Cool!

The Game Boy is the number one hand-held games system, with 60 million players, male and female, young and old, all over the world. It comes in two forms and a rainbow of colours, and has a library of over 450 plug-in Game Paks that range from arcade shooting action, to puzzles, to adventure games. You can even link two Game Boys together to challenge a friend!

But the best thing about the Game Boy is that you can play it anywhere. Its built-in LCD display shows the action in high-resolution, monochrome graphics, and a headphone socket lets you plug into high-quality stereo music and sound effects. Best of all, the Game Boy runs for hours on 4 AA (Game Boy Classic) or 2 AAA (Game Boy Pocket) batteries, so you don't have to be permanently connected to the mains to have fun.
